

LAND DEVELOPMENT ENGINEER

CROMWELL

**Interesting projects. Real involvement.
A great place to live.**

Coterra is looking for a Land Development Engineer to join our Cromwell team. We are looking for someone who enjoys practical land development work and wants to be closely involved in projects rather than working on one small part of a larger process. This could suit someone with relevant industry experience, or a strong graduate ready to build their career in Central Otago

► THE ROLE

- Land development and civil design
- Residential and rural subdivision projects
- Earthworks, roading and three waters design
- Construction monitoring and project delivery
- Involvement from early design through consenting and construction
- Work directly with directors, clients, contractors and Councils
- Increasing project responsibility as your experience grows

► WHO WE'RE LOOKING FOR

- Relevant civil engineering or land development qualification
- Practical industry experience preferred
- Strong design and problem-solving skills
- Accurate, capable and practical
- Good communication and a team-focused approach
- Comfortable working across design, consenting and construction
- Experience with 12d or similar design software is an advantage

WHY CROMWELL

Cromwell is at the centre of one of New Zealand's most active and varied land development regions. Enjoy lakes, mountains, trails, ski fields and easy access to Wānaka, Queenstown and Alexandra while building your career in a growing Central Otago community.
